In times of loss, it is difficult for family members to deal with all the problems and uncertainties involved in a wrongful death lawsuit.

If someone close to you was killed in an accident, please call us at 860-347-5607 or contact us by [e-mail](#) today so we can discuss how we can help.

We are more than experienced personal injury attorneys

We have a deep understanding of the physical nature of serious injuries as well as the potential psychological and emotional trauma that can accompany any life-threatening accident. When long term ramifications of a serious accident include a brain injury that results in the need for lifelong medical care or a court-appointed guardian, hiring an aggressive and qualified attorney is crucial.

Brain injuries can cause physical, cognitive, social, and vocational changes. Recovery is often a lifelong process of adjustments and accommodations for the injured individual and his or her family. Not all brain injuries are "traumatic" in nature. Brain injuries from other causes, such as oxygen deprivation, can be equally devastating.

Appropriate treatment of a brain injury can involve diagnostic testing, medication, surgery, and rehabilitation. Rehabilitation - a critical aspect of optimal recovery - is prohibitively expensive. For catastrophic injuries, an extensive team of caregivers may be necessary.

If you or someone close to you has experienced a brain injury as the result of an accident or negligence of another, please seek medical advice and [contact us](#) at 860-347-5607 for legal assistance as soon as possible.
